

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

AJN Investment & Development has an exciting opportunity for a Residential and Commercial Installers. Are you someone who likes challenges and a wide range of responsibilities and project types Do you value a positive work atmosphere and want to find people you enjoy working with If so, we would like to hear from you.

About AJN

AJN Investment & Development are building a state-of-the-art facility in Belledune, New Brunswick to exclusively manufacture a low-cost, modern, and eco-friendly panel building system. An alternative to conventional building methods, our product is stronger than a concrete wall and our sandwich wall panels are constructed with lightweight energy-saving materials, including an outer shell and an interior comprised of a unique combination of fiber-reinforced cement and a polystyrene or fly-ash mixture, furthering its strength and resistance to the elements. Assembled like LEGO®, they can be used as interior walls, exterior walls, floors, or roofing. By offering this new material, residential and commercial construction projects will now have an environmentally friendly and sustainable option.

AJN INVESTMENT & DEVELOPMENT 2008 LTD
