Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Intermediate Software Developer

An excellent opportunity to work in a team environment and challenge your technical skills with one of Canada's top 100 employers

Salary $62,718.94 - $71,507.64 annually

As an Intermediate Software Developer, you will be a member of the development team working with business analysts, contracted developers and subject matter experts on operational maintenance and project work for the TACS application, a complex COTS application used in the Revenue Division of the Ministry of Finance. In addition to software development, your robust technical skills include experience with configuration management, forms creation/ maintenance, templates, business objects and data table designs. Your expertise also includes assessing requests for change, clarifying requirements with business analysts and subject matter experts, investigating and determining solutions and implementing appropriately.

This key role requires a strong knowledge of the Systems Development Life Cycle (SDLC) methodologies. You will be following industry best practices for software development and will use your position to provide business solutions within the Ministry of Finance. If you are interested in joining an employee driven branch with an open, inclusive, and positive culture, then this opportunity is for you.

Qualifications for this role include:

â€¢ Degree, diploma, certificate in computer science or related discipline;

OR

â€¢ A combination of education, training and equivalent experience may be considered. Equivalent experience is defined as actual experience in managing and supporting major business applications in multiple areas such as planning, designing, developing, supporting and/or maintaining applications.

â€¢ Demonstrated experience in investigating and implementing complex IT integration challenges.

â€¢ Demonstrated experience troubleshooting, testing, implementing software and hardware solutions.

â€¢ Experience in structured and object orientated programming in a complex rules based environment.

â€¢ Experience in managing and developing software applications in a Microsoft windows server environment.
