

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Lilly is one of the top 10 largest pharmaceutical companies in the world. Lilly has remained dedicated to creating medicines that help improve peoples' quality of life for more than 135 years. At the heart of Lilly's operations are its core values – excellence, integrity and respect for people and these are reflected in business practices that include strong governance principles, the ethical development of medicines, transparency and ethical product promotion.

Responsibilities:

The MSL will serve as a scientific resource for Canadian experts in the field of Oncology and related disorders. The MSL is responsible for responding to requests for in depth, cutting edge scientific information from the medical community in the autoimmune field including the latest scientific literature, the latest research from major scientific conferences, updates on Lilly's educational activities and Lilly's pipeline research activities.

The MSL will also gather feedback and insight from Scientific Experts and Thought Leaders to better inform Lilly's research and overall strategic direction. By facilitating scientific exchange between the academic community and Lilly, the MSL has the opportunity to shape the future of healthcare with information that addresses important clinical and scientific questions.

In all interactions, the MSL has responsibility to ensure that activities are compliant with all applicable guidelines, Rules and Regulations for Conducting Research, IMC Code of Conduct, the Eli Lilly Canada Policy on the Promotion of Pharmaceutical Products and Ethical Interactions with Health Care Providers, and other prevailing regulations/codes that may pertain to their work in the future.

Objectives:

Develop and maintain mutually beneficial, peer-to-peer relationships with the scientific community

- * The MSL will spend a significant amount of their time on customer-facing activities to develop relationships with external customers including scientific experts, researchers, educators and clinical investigators. The MSL will serve as a major representative of Lilly for these health care professionals, providing deep and advanced disease state and product information as well as facilitating the work of the scientific expert when it aligns with Lilly's mission. An important aspect of this work will be to connect thought leaders and scientific experts with other Lilly resources (e.g., Discovery, Real World Evidence Scientists, Clinical Research Physicians and Global/Canadian External Research & Development).

Effectively communicate with Scientific Experts and Thought Leaders with up to date scientific knowledge and provide services that meet their needs.

- * The MSL will be considered a reliable, trusted resource of accurate, up-to-date medical and scientific knowledge requested and desired by their customers. They will respond in a timely way to personal or electronic inquiries with any available information which may include reprints or posters, medical letters, literature citations, access to internal and external experts, slides and other teaching-related material.

Continually enhance scientific knowledge

- * The MSL is required to maintain technical expertise within a therapeutic area to engage in scientific discussions with scientific experts. The MSL will be expected to engage in continuous learning within the therapeutic area they represent. They will attend appropriate scientific meetings, conduct routine literature searches and will be expected to communicate regularly with each other to assure that the entire group benefits from individual learning whenever it is relevant.

Support the affiliate medical business objectives and cross functional partner

- * The MSL will be responsible for interfacing the scientific expert and Lilly resources/internal business partners such as Clinical Research Physicians, Medical Information Associates, Medical Education, Corporate Affairs, and Marketing as requested by the expert. They will also report the clinical insights and unanswered customer questions they have received from the scientific experts to the medical and brand teams. The MSL job entails not only scientific and customer expertise, but also requires the ability to understand and effectively utilize approved resources to fulfill administrative, procedural, and legal requirements in order to address the customer needs and support internal Lilly business.

Basic Requirements: Education and Experience

- * Advanced degree in health sciences (PhD, MD, Pharm D) with 2-3 years of relevant clinical or therapeutic experience in Oncology/Hematology.

- * OR MSc in health care/professional designation (BScN, PT, RD etc.) considered if 5 or more years of relevant clinical experience in Oncology/Hematology.

- * OR previous MSL experience and sound knowledge of the pharmaceutical industry

Additional Skills/Preferences

- * Intellectual curiosity and intelligence about the field of Oncology/Hematology

- * Ability to critically appraise scientific information / literature

- * Strong presentation skills including the ability to comprehend large amounts of scientific content, which is then communicated in a clear, concise fashion

- * Demonstrated ability to build strong/collaborative peer-to-peer relationships with external customers

- * Familiarity with the academic community and medical research

- * Significant direct experience in servicing customer needs for complex information

- * Experience in professional networking with positive mutually beneficial outcome
- * Strong teamwork and interpersonal skills including an ability to work effectively with internal colleagues and cross-functional team member
- * Strong project management skills with an ability to work within teams to prioritize key projects and medical tactics
- * Previous Medical Science Liaison experience
- * Significant clinical or research work in the areas of Oncology/Hematology
- * Coverage territory: Western Canada
