Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Job number: R-1003013
Location: Regina, Saskatchewan
Closing Date: 12/05/2021
Worker Type: Permanent
Ability to write clean, smart code required
Join the team responsible for the design, development, testing and deployment of code, and interpretation of business requirements.
What youâ€™ll do:
- Analyze and develop new code including automation, integration and unit tests
- Implement code fixes and support user testing
- Build and execute automation tests
- Ensure technical solutions are developed and maintained in the most efficient and effective manner
What weâ€™re looking for:
- Experience producing working code with less supervision on relatively routine development tasks
- Innovative problem-solver and critical thinker with a customer focus
- Advocate of smart, clean and maintainable code
- Passion for technology and software development
What youâ€™ll need:
- Bachelorâ€™s degree in computer science or engineering and at least five years of related experience (or an equivalent combination of education and experience)
