

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce Canadian Indigenous Job Seekers to a new approach to job searching. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Canadian Indigenous Peoples with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Ministry of Transportation and Infrastructure : Coquitlam, Kamloops, Prince George and Victoria

The Structural Engineering Section develops and maintains policies, standards and procedures related to planning, design, construction, inspection, evaluation, rehabilitation, maintenance, seismic-structural, hydraulic, hydrologic and river engineering policies for bridges and related highway structures to ensure safe and efficient delivery of cost-effective design, construction and rehabilitation operations.

The Senior Bridge Design and Construction Standards Engineer develops and manages the Structural Section's framework of professional and technical policies, standards, procedures and practices pertaining to design and construction of bridges and related highway structures; and provides the Ministry and Partners with expert advice and compliance monitoring direction related to bridge design and construction.

Qualifications for this role include:

• Graduation from a recognized university with an Applied Science or Engineering degree in Civil or Structural Engineering.

• Additional training in computerized scientific and engineering information systems and tools; the principles and practices of industrial project management; and the basics of bridge cost accounting and financial control systems.

• Must be registered or immediately* eligible for registration as a Professional Engineer in good standing with the Association of Professional Engineers and Geoscientists of the Province of British Columbia (APEGBC). *Immediately registered means you are a Professional Engineer in good standing in another Canadian jurisdiction that can be immediately transfer to the Association of Professional Engineers and Geoscientists of the Province of British Columbia

• Extensive experience in bridge design, construction, inspection and maintenance

• Extensive experience designing and managing bridge design and construction projects

• Considerable experience monitoring government and private sector professional bridge personnel for compliance with approved policies, standards, procedures, codes and engineering best-practices

• Several years' experience analyzing and developing bridge design and/or construction engineering policies, standards, procedures, and practices

• Several years' experience evaluating alternative design and construction methods and materials against policy, standards, code and common practices for bridge design, construction and project co-ordination.
