

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TC Energy, our job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously.

Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities.

Weâ€™re proud of how our hard work and commitment sets us apart and benefits society, every day. Weâ€™re looking for new team members who share our values and are ready to take on exciting challenges.

The opportunity

Are you passionate about safety, working in a collaborative environment, and taking initiative Are you highly motivated and a self-starter that enjoys working in a field environment As part of the Canada Gas Operations team youâ€™ll apply your critical thinking and technical skills to keep our natural gas compressor stations, measurement stations, and pipeline assets operating safely and reliably. Our Canadian Natural Gas Pipelines business includes over 43,000 kms of existing pipeline, 120 compressor stations and approximately 1,500 measurement stations across Canada.

Our jobs are for innovators, thinkers, doers, team players and leaders. Theyâ€™re for people who dream big, seek purpose, value good teams and like to do big things.

The Field Work Planner will work jointly and collaborate with Area Managers, Maintenance Program Managers, Project Managers and technicians to coordinate and schedule work within the region, as well as schedule regional pipeline resources across the Canada Gas Operations (CGO) system as required. This position requires the skills to develop, manage and assess work plans to enable the effective completion of work activities across the CGO system.

This position may require long periods at a work station, and may be required to drive long distances, be exposed to field operations and construction environments, as well as travel on short notice to other company locations which may involve some overnight stays away from home (estimated up to 25%). Hours of work may need to be extended as business needs arise.

What youâ€™ll do

In addition to focusing on work scheduling and coordination of short to intermediate term activities, achieving high levels of productivity, safety, equipment reliability and availability and environmental compliance, the Field Work Planner (FWP) role will:

- â€¢ Develop short term one to six-month area work plans incorporating maintenance programs, regulatory compliance activities, project support and corrective maintenance work

- â€¢ Plan/manage efficient resource schedules to support major and minor outages, projects and routine maintenance

- â€¢ Develop work execution plans and detailed resource schedules to provide direction and coordination of project activities within the region

- â€¢ Ensure work orders and other required documentation are created and properly scoped and reported for all work in the area

- â€¢ Manage the work plans to ensure that corrective work and work backlog items are incorporated and opportunities to bundle and combine work are identified and all work is resourced as required

- Utilize regional contracting strategies, including supply of parts and vendor services, to ensure required resources are available to complete the work as per the plans
- Act as the area contact to all other departments for short term planning issues, resource availability and updates/progress reports for all major area work
- Collaborate and support other Field Work Planners as needed within the Region
- Provide regular assessments and reports of work plan completion and variance
- Incorporate revisions and ensure accuracy of entity information and maintenance programs that are modified at a local/regional level
- Participate in regional management on-call rotation

Minimum Qualifications

- Post-Secondary education in a related field
- Minimum six (6) years of related experience in a planning, project coordinator or work management
- Preference will be given to candidates with a minimum of two (2) years industry related experience as a Business Analyst or a certified Project Manager (PMP)
- Solid understanding of the fundamental principles of Maintenance Management and analytical skills supported by use of applicable software applications
- Capability and flexibility to respond to time pressure by adjusting work hours to meet critical deadlines
- Ability to work effectively both independently and in cross-functional teams
- Detail oriented with good organizational, planning and financial skills
- Strong capability to effectively utilize available resources and meet Regional asset operation requirements
- Ability to prioritize and manage numerous competing work requests and expectations simultaneously
- Excellent communication, influencing and interpersonal skills
- Ability to provide and present timely and relevant feedback and or reporting to various stakeholders
- Application of analytical and reporting skills to communicate work progress and variances
- Strong leadership skills for delegation, negotiation, and consensus building to coordinate work to meet Regional objectives.
- Ability to work outside of normal business hours when required

Preferred Qualifications

- SAP experience
- Related industry trade skills and knowledgeable about asset maintenance practices
- Strong knowledge and experience with computerized maintenance management systems

This position requires candidates to:

- Have and maintain a valid driver's license and safe driving record
- Be subject to callouts with extended workdays/weeks as required to complete assignments or emergency support
- Travel frequently within the assigned area of responsibility
- Travel occasionally to other company locations which may include overnight trips

About Canada Gas Operations
