

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Ministry of Citizens' Services

Victoria

Full Stack Developer

Reporting through the Office of Government's Chief Information Officer, the Connectivity Division leads government's mandate to expand internet connectivity to all British Columbians in all corners of the province. The division manages provincial funding programs, provides leadership, expertise, tools and supports to communities and local governments in the expansion, coordination and provisioning of telecommunications services, evaluating innovation solutions and pathways to the adoption of emerging technologies that enable the digital transformation of communities in every corner of the Province.

As a Full Stack Developer, your responsibilities will include the coordination, development, and delivery of scalable web applications in a continuous deployment environment. You will have well-developed software engineering skills, proven practical problem-solving abilities and a demonstrated acumen for efficiently realizing business value in software systems. This position will demand constant learning and development; you must stay current in both the business domains they support and the wide range of technology available. Innovation is a core strategic goal of our organization, and this role is a critical player in providing a modern public service with cutting-edge tools. If you thrive in an environment dedicated to cooperation and teamwork, and enjoy working towards group and organizational goals, we look forward to your application.

Qualifications for this role include:

- Post-Secondary diploma (or higher) in Computer Science, Web Development or related field and a minimum of two (2) years' related experience; OR,
- An equivalent combination of education and related experience may be considered.

*Related experience must include the following:

- Experience as a Full Stack Developer.
- Experience using a variety of modern development tools, such as HTML, CSS and JavaScript libraries, relational and non-relational databases.
- Experience with API development and integration and continuous development environments.
