

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

At Rogers, we connect Canadians to a world of possibilities and the memorable moments that matter most in their lives. Every day we wake up with one purpose in mind. To bring loved ones together from across the globe. To connect people to each other and the world around them. To help an entrepreneur realize her dream. A sports fan celebrate a special moment.

Because we believe connections unite us, possibilities fuels us, and moments define us.

Rogers Outside Plant Engineering (OPE) has an exciting opportunity for you if you are striving to work in a motivating, dynamic environment as an Outside Plant Engineering Planner. We are looking for responsible and passionate team members who will administer, organize, and work toward coordinating multiple Outside Plant Engineering process and design deliverables. This is your chance to demonstrate your skills and competencies in a rapidly changing equal opportunity environment in a large organization. We look forward to meeting with you and helping you succeed in this opportunity.

The position will be responsible for Fiber/CATV design/mapping and coordination of projects as directed by the Outside Plant Engineering Manager. Understanding that the "Customer Comes First". It will be the successful applicant's responsibility to ensure that Rogers's customers will be installed within demanding deadlines.

Responsibilities include:

The position will be responsible for Fiber/CATV design/mapping and coordination of projects as directed by the Outside Plant Engineering Manager. Understanding that the "Customer Comes First". It will be the successful applicant's responsibility to ensure that Rogers's customers will be installed within demanding deadlines. This will be accomplished by:

Liaise with local utilities, municipalities and private property owners in order to ensure the timely completion of projects.

Provision accurate field information for design of projects. This involves survey existing plants, structures and proposed routes for planning and design of Fiber/CATV facilities.

Ensure the project's accuracy before issuing plans to the Construction Department and update construction information in order to provide up-to-date system maps.

Coordinate a project, which involves cost estimates, reports and updating other departments on project status and flow of information between the groups, which minimizes negative subscriber and municipal issues.

Liaise with Customer Service, Construction Department, subcontractors and subscribers to ensure a smooth flow of information between the groups, which minimizes negative subscriber and municipal issues.

Investigate, coordinate and provide detailed synopsis of special projects as requested, ensuring completion within established timelines.

Learn and adhere to all applicable Health and Safety regulations, in accordance with legislation and related Company policies

All other duties as assigned

Qualifications

Demonstrate behaviors which support the key success factors: Customer Focus, Teamwork, Communication and Innovation.

Post-secondary diploma in one of the following is preferred: Electronics Technology, Data Communication or Civil Technology.

Formal Project Management training would be an asset.

Strong organizational skills along with the ability to comfortably excel while managing multiple projects simultaneously.

Knowledge of CSA standard, municipal by-laws and regulatory and utility standards.

Strong communication skills and good interpersonal skills are required.

Proficiency in Microsoft Office, AutoCAD and SpatialNET

Minimum 5 years in the telecommunications field.

Must have a valid driver's license with a safe driving record.
