

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Senior Java Tech Lead

Position Description

We are Canada's largest Information Technology services provider, and after 40 years, we're still growing!

We have an exciting career opportunity for a Java Tech Lead for one of our clients.

This is a unique opportunity for a Tech Lead to drive the technical transformation of a product, turning the solution into a marketable SaaS product, and taking the new offering to market. This team is driven by collective success. Collaboration and the power of an inclusive team are at the forefront of creating a shared vision.

Your future duties and responsibilities

- Passionate about technology as well as developing and coaching to bring out the best in people. You have led diverse, high performing teams.
- You understand that success is in the details. You notice things that others don't. Your critical thinking skills help to inform your decision making
- Proficient in managing the development of multi-tier, secure business applications for high availability, scalability and performance
- Ability to rapidly develop expertise in emerging technologies through hands on, real-time - on the fly exposure and involvement
- Excellent technical problem-solving abilities with successfully implemented solutions
- Lead a team of developer to successful delivery
- Technical analysis, solution design, and document technical artefacts
- Perform code and design reviews
- Provide technical problem solving / technical analysis skills to the team through coaching and mentoring activities
- Lead with an acumen for documentation of design and process
- May participate in/lead emerging digital transformation technology projects
- May participate in/lead application design activities creating multi-platform applications that span mobile, tablet, desktop and connected devices
- Act as a resource for software developers on policies, procedures, design concepts and technical issues
- Maintain and enhance existing software to address strategic business development needs to improve the software

Required qualifications to be successful in this role

- Demonstrate current extensive hands-on design and development experience.
- Experience in leading the design and development of Java applications,
- Strong background in the delivery lifecycle with a deep hands on technical knowledge of Java/J2EE, Spring Framework/Log4J, Unix/Linux, Docker/Open Shift, SOAP/XML/REST-JSON, GitHub/SVN, IDE (Eclipse), Maven/Ant, Jenkins /Jira/Confluence, SOAP UI/Junit/Postman, Design Patterns/JVM Internals.
- Experience on NoSQL databases like MongoDB / Cassandra and relational databases such as Oracle / MySQL
- Experience migrating / implementing scalable and elastic applications on cloud infrastructure using AWS/Azure/GCP. GCP Preferred.
- Experience with Infrastructure as Code tools (Terraform, AWS CDK etc.)
- Work experience in Agile, Iterative and Software Delivery Life Cycle (SDLC)

Insights you can act on

While technology is at the heart of our clients' digital transformation, we understand that people are at the heart of business success.

When you join CGI, you become a trusted advisor, collaborating with colleagues and clients to bring forward actionable insights that deliver meaningful and sustainable outcomes. We call our employees "members" because they are CGI shareholders and owners, and, as owners, we enjoy working and growing together to build a company we are proud of. This has been our Dream since 1976, and it has brought us to where we are today-one of the world's largest independent providers of IT and business consulting services.

At CGI, we recognize the richness that diversity brings. We strive to create a work culture where everyone belongs, and we collaborate with clients in building more inclusive communities. As an equal opportunity employer, we empower all our members to succeed and grow. If you require an accommodation at any point during the recruitment process, please let us know. We will be happy to assist.

Ready to become part of our success story Join CGI-where your ideas and actions make a difference.
