

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

### Description

Closing Date (MM/DD/YYYY): 02/14/2021

Worker Type: Permanent

Language(s) Required: English

Proven leadership skills required

Based on your extensive experience with cyber security, infrastructure, networks, and cloud architecture, youâ€™ll develop strategies to secure our applications, network and infrastructure.

What youâ€™ll do:

- Help improve tools and practices in an agile, fast-paced IT environment
- Facilitate collaboration with colleagues to solve interesting and challenging issues
- Automate processes, customizations and upgrades

What weâ€™re looking for:

- Proven leader who is comfortable mentoring an autonomous, cross-functional, agile team
- Problem-solver who can resolve complex problems independently

What youâ€™ll need:

- A bachelorâ€™s degree and at least six years of related experience (or equivalent combination of education and experience)
- Technical expertise in one or more of these areas: infrastructure, networks, security, and cloud architecture
