# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

**Description**

The Solution Integrator plays an essential role in the Software Engineering lifecycle, as they are accountable to put in place and deliver the solution envisioned by the architects. As a Solution Integrator, you act as a translator between the different roles within a project, by ensuring a continued understanding of the solution amongst the project team. You are the master of solution delivery between all the players and you lead design decisions, solution integration and overall solution implementation.

As a Solution Integrator, your role is responsible for providing comprehensive functional expertise on solutions and advocate usage of re-usable patterns, automation, platforms and make sure enterprise reference architecture is respected. The Solution Integrator defines the interaction between application packages, databases, and middleware systems in terms of the coverage of the business and functional requirements. You have experience in leading a group of functional designers and you are highly focus on team collaboration.

You want this job because you like to conceptualize complex solutions and lead a team that will help you deliver a fully integrated solution for a multi-year transformation program. You master software development and integration lifecycle and you can envision, materialize and coordinate conversion and implementation strategies. You are highly customer-focused, you have strong analytical and problem solving skills, and you know how to leverage your network and team to foster synergy.

Responsibilities

Â· Collaborate with Business, Architects, Designers (SAP, legacy, UX and data), Basis, Security, Transport and Landscape to understand business objectives and purpose of the future application and deliver it

Â· Understand integration points between, front-end, backend and satellite systems and highlight potential solution delivery risks

Â· Ideate and identify application components required to deliver the full integrated solution

Â· Ensure all the pieces of the solution have been thought and that solution respect agreed architecture

Â· Work closely with all teams involved (including vendors) in defining and planning the delivery of the solution

Â· Oversee application design activities (including vendors)

Â· Lead design sessions and overall design decisions

Â· Review and approve functional documentation by respecting CN methodology standards

Â· Collaborate with Quality Testing to build-up testing strategy and overall integration testing

Â· Collaborate with Business and Data Designer to define data conversion strategy

Â· Ensure consistency of the integrated solution by reviewing and approving solution artifacts

Â· Manage and mitigate solution and integration delivery risks

Â· Assist in improving software engineering processes and methods overall

**Education Requirements**

Requirements

Â· Bachelor degree in Computer sciences, Software Engineering or Information technology

Â· Minimum of 7-12 years of relevant experience in software engineering lifecycle process

Â· Experience with software development lifecycle process

Â· Familiar with API Management platforms such as APIGee (preferred), WSO2, CA Layer7, Mashery or others

· Experience with API concepts and technologies such as REST, JSON, XML, SOAP, YAML, and Swagger
· Strong knowledge in technical and functional specifications using flowcharting, sequence diagrams, or any other UML pattern needed.
· Experience in leading a team in the context of a project lifecycle (waterfall and agile/hybrid agile)
· Bilingualism with high proficiency in English (spoken and written)
