

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

### Description

We are looking for an Electrical Power Systems Design Engineer. Phase One of the project will last 3 months, involving feasibility reports and analysis of renewable energy sources. The candidate will be responsible for analyzing renewable and unconventional electrical power sources located in Calgary, Alberta with a goal of establishing reliable renewable power sources for a major electrical energy consumer.

Phase Two will start once a design decision has been made, the Electrical Power Systems Design Engineer will be responsible to institute his chosen design. The engineer will be responsible for all aspects of the installation process of the chosen electrical generation system.

### Experience

The candidate will be a university graduate in Engineering who has at least 5 years experience in generation of electrical power using unconventional and/or renewable electrical generation techniques, with an ability to put ideas and concepts into production. A proven track record of taking concepts from the drawing board to plant floor is essential. Experience in project tendering is a definite asset.

The candidate will also have experience in dealing with being in compliance with regulatory agencies, and inspections, be computer and software literate, and possess excellent communications skills, and leadership qualities.

Experience in Biomass Based Power Plant commission, keyed to dual use natural gas and biomass fuel, experience in solar electrical generation, and non-conventional electrical energy generation.

### Credentials

Eligible for Apega Membership

### Education Requirements

Bachelors degree in Engineering

### Work Environment

Office and Plant settings
