

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Indigenous Health Researcher

Job ID	EB-28-37-2A-AF-D5	
Web Address	https://careers.indigenous.link/viewjob?jobname=EB-28-37-2A-AF-D5	
Company	Saskatchewan Health Quality Council	
Location	Saskatoon, Saskatchewan	
Date Posted	From: 2021-01-22	To: 2021-03-23
Job	Type: Full-time	Category: Education
Languages	English	

Description

The Saskatchewan Health Quality Council (HQC) works in service of the province and its citizens to meet the challenges of improving health and health care. As an independent, evidence-driven organization, we share our expertise in systems thinking and educational design to help build the capability to improve. We also influence policy and delivery by identifying what works and why through objective analysis.

The Indigenous Health Researcher will work closely with key health system partners, post-secondary academic institutions, community-based organizations, government sectors, and patient partners to accelerate improvement in the quality of health and health care for First Nations and Māori people in Saskatchewan. The Researcher will help our organization build and lead research activity to support and advance our strategic focus of supporting First Nations & Māori communities to make sustainable improvements to enhance their health and wellness. The researcher will also be responsible for 1) advancing the use of data analytics to inform evidence-based decision making, practice, and policy through research collaborations; and, 2) designing and developing measurement infrastructure with our partners to address gaps in health and health care quality while building capacity and capability with our partners.

As the Indigenous Health Researcher, you will have strong interpersonal and communication skills, including the ability to build trusted relationships with internal and external stakeholders. You will be a strategic thinker and have strong leadership skills, by giving direction and fostering the ongoing learning or development of self and others. You will have experience in working with First Nations and Māori communities and organizations. As the successful candidate, you will have a good understanding of research principles, practices, and protocols. You will have knowledge in a specialized area of research methodology, such as survey design and administration, qualitative research methods and analysis, longitudinal analysis, time-series analysis, hierarchical regression modelling, spatial analysis or cost analysis. You will have good analytical and presentation skills and be proficient with statistical/analytical software, database and spreadsheet programs, word processing applications, and virtual meeting programs.

As the successful candidate, you will have a Master's or a PhD degree in a relevant discipline, such as health science, social science, or statistics along with three years' work experience, preferably in a health environment. Knowledge and experience in research involving health administrative, clinical databases, and training in quality improvement science, tools, and methods would be considered assets. You must hold a valid driver's license, entitling you to drive in Saskatchewan. You must also provide and maintain a satisfactory criminal record check.

How to Apply

To explore this exciting opportunity further, please submit your resume via the blue "Apply" button by visiting the Boyden Canada Opportunities website at <https://www.boyden.ca/canada/opportunities/>, or submit your application and related materials to opportunities@boyden.com and state the title of the position in the subject line of your e-mail. Please be assured that your participation in this process will be kept confidential. For more information on this opportunity, please contact Boyden at mcolquhoun@boyden.com or 306-986-2295.

The HQC is committed to equity in its policies and practices. HQC supports diversity in its learning and work environments and ensures that applications for members of underrepresented groups are seriously considered under its employment equity practices. All qualified individuals, especially First Nations, Metis, or Inuit individuals are strongly encouraged to apply.

We thank all applicants for their interest, however only those under consideration for the role will be contacted.
