

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Help bring research to life and drive your career forward with the National Research Council of Canada (NRC), Canada's largest research and technology organization.

The National Research Council operates labs and research facilities across the country, each with its own unique challenges related to health, safety and environmental management. NRC is involved with innovative research in transportation, engineering, life and medical sciences, and emerging technologies in computer science, electronics, astronomy and nanotechnology. Each area presents a wide and exciting variety of health, safety and environment related aspects ranging from worker health and protection, to animal safety, biosafety, radiation safety, hazardous materials management, noise and air emissions, waste waters, species at risk, and the list goes on.

NRC's Health, Safety and Environment Branch (HSE) proactively establishes, promotes and implements best practices in health, safety and environmental management. The HSE Branch provides enabling and support services to NRC's Research & Development activities, assuring the health and safety of our employees, our neighboring communities and our environment.

As an Health, Safety and Environment Advisor (HSE Advisor), you will partner with your assigned clients in the research centers and corporate branches to expand upon a culture that works proactively to ensure the health and safety of employees, visitors, contractors, our neighboring communities, and the environment. You will be expected to develop a strong knowledge of your client's business and their resulting challenges related to health, safety and environment stewardship so that you can effectively support implementation and monitor NRC's occupational health, safety and environmental management policies and programs. The HSE Advisor team members are supported by a strong operations group and risk area experts who will provide technical advice and guidance as required.

Experience

Candidates must possess:

• Significant experience providing HSE support in remote/rural worksites that are multi-faceted operations; AND
• Experience working in a scientific, engineering and/or industrial work environment including experience supporting the implementation of environment, and/or health & safety related legislation, regulations, policies and/or programs. Ideally this would include experience such as performing risk assessments, preparing safe work procedures, conducting audits or workplace inspections, providing emergency response support, and/or participating in investigations following incidents and accidents.

OR

• Significant experience in providing support to business units with respect to the implementation of environment, and/or health & safety related legislation, regulations, policies and/or programs. Ideally this would include experience such as performing risk assessments, preparing safe work procedures, conducting audits or workplace inspections, providing emergency response support, and/or participating in investigations following incidents and accidents.

• Experience providing health & safety support in remote/rural worksites that are multi-faceted operations may be considered an asset.

Alternative

Candidates who possess relevant education in both the science/engineering field and the industrial hygiene field may be considered even if they don't meet all the stated experience requirements.

Candidates who do not possess a significant level of experience but who have very relevant education and experience background may be considered.

Education Requirements

Bachelor's degree in science (chemistry, biology, biochemistry, environment), engineering, or industrial hygiene.

A Master's degree in one of the disciplines listed above will be considered an asset.

Preference may be given to those with a professional certification in a field relevant to the position.

A combination of education and experience may be considered – see alternative section below.

Essential Skills

Technical Competencies

• Knowledge of at least one of the following areas: the Canada Labour Code Part II and/or the Canadian Environmental Protection Act, including applicable directives, standards and guidelines, and their related federal, provincial, and municipal regulations and policies

• Ability to interpret applicable environmental, health and safety legislation, relevant standards and/or accepted best practices

• Ability to synthesize multiple sources of information or summarize complex problems and present the subject in a concise written or oral briefing

• Ability to provide advice and guidance to clients

• Ability to lead teams and/or working groups

Work Environment

Condition of Employment: Reliability Status

Additional Skills

Behavioural Competencies

• Management services - Communication (Level 2)

• Management services - Results orientation (Level 2)

• Management services - Client focus (Level 2)

• Management services - Teamwork (Level 2)

• Management services - Initiative (Level 2)

• Management services - Conceptual and analytical ability (Level 2)

• Management services - Organizational and environmental awareness (Level 2)

Other

Relocation

Relocation assistance will be determined in accordance with the NRC's directives.

Notes

• A pre-qualified list may be established for similar positions in other locations for a one year period.

• NRC employees enjoy a wide-range of benefits including comprehensive health and dental plans, pension and insurance plans, vacation and other leave entitlements.

• Preference will be given to Canadian Citizens and Permanent Residents of Canada. Please include citizenship information in your application.

• The incumbent must adhere to safe workplace practices at all times.

• The incumbent may be asked to travel to other NRC sites.

As an employer who values diversity in its workforce, we encourage candidates to self-identify as members of the following designated groups: women, visible minorities, aboriginal peoples and persons with disabilities. Measures for accommodation are available to all candidates retained for further assessment.
