

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Closing Date (MM/DD/YYYY): 11/03/2020

Worker Type: Permanent

Language(s) Required: English

Enterprise data warehouse expertise needed:

Lead the technical vision, architecture and design of data warehouse solutions to enable business intelligence (BI) and analytics. Work with technical leads and business stakeholders to ensure FCC's vision around data warehousing, BI and analytics is met.

What you'll do:

- Evaluate proposed systems, changes and additions
- Provide oversight into the decision process and participate in project implementation
- Collaborate in requirements gathering, discovery and interfacing
- Guide standards and principles for development within the environment
- Mentor developers and analysts
- Participate in cross-functional teams that deal with the full spectrum of information management technology
- Investigate research and development of new, emerging technology

What we're looking for:

- Strong leader with proven experience in DevOps environments
- Confident communicator able to work effectively with support teams, user communities and application development groups
- Ability to clearly communicate advanced technical decisions to non-technical business stakeholders and executives
- Familiarity with agile practices, preferably in a financial institution context
- Strong analytical, troubleshooting and problem-solving skills

What you'll need:

- A degree in computer science and at least eight years of technical experience (or equivalent combination of education and experience); a financial and enterprise risk background is an asset
- A passion for technology and software development
- Advocacy of smart, simple and clean code
- Strong Linux and networking knowledge
- Strong development background
- Knowledge of security and encryption
