Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Canpotex is proud to be one of Saskatchewan's Top Employers in 2023. We are a people-focused organization with diverse and dynamic career development opportunities. Join us as we work towards our mission of global food security. Apply today!

We have an exciting opportunity to grow your career as an Information Technology Developer (23-19). This position is permanent and based in Saskatoon.

We are:

Headquartered in Saskatoon with three international offices, we are one of the world's largest suppliers of potash overseas. On behalf of our Shareholders, Mosaic and Nutrien, we market and deliver Saskatchewan potash, a valuable fertilizer nutrient, to millions of fields and farmers globally - ultimately helping the world grow more food.

We offer:

Situated in the vibrant Saskatoon area of River Landing, occupying a spacious, world-class contemporary office building that supports our culture. We proudly offer a highly flexible hybrid-work environment that encourages a flexible work-life balance while promoting meaningful connections with colleagues and stakeholders. We are passionate about ensuring food security for young people through our community investment program that allows our employees individual volunteer opportunities. We proudly offer a competitive total rewards package, career growth opportunities and the experience to collaborate with global colleagues and customers.

The opportunity:

Responsible for the design, development, implementation, installation, and testing of application software, reports, data warehousing and other computer related solutions using C# and other programming languages.

Designs, builds, and maintains efficient and reliable C# code.

Partners with employees from other departments as a subject matter expert and as a technical resource during projects.

Works with IT department, end-users, and management to plan systems and operations to meet Canpotex's information processing and reporting requirements.

Assists with administering reporting, workflow, integration and security processes.

You have:

Bachelor's degree or Diploma in Computer Science or a related field.

Minimum three to five years' experience in software/technical development.

Experience with development and reporting tools such as MS Visual Studio, C#.Net, .Net Core API, Entity Framework, Angular, SQL Server Reporting Services (SSRS), MS SQL Server Integration Services (SSIS) and DB2.

Experience with Microsoft Office applications and VBA.

You bring:

Excellent analytical, problem solving, organizational and communication skills.

The ability to communicate ideas in both technical and user-friendly language.

Ability to function as an effective member of a team environment; as well, work independently, prioritize tasks and provide timely solutions.

Apply online by June 8, 2023.
