

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Closing Date (MM/DD/YYYY):02/23/2024 Worker Type:Permanent Language(s)

Required:English Salary Range (plus eligible to receive a performance based incentive, applicable to position) :\$89,369 - \$120,911 Join the team responsible for using a broad range of tools, technologies, and platforms to enable developers, administrators, and end users to perform their tasks. Your work will include provisioning and managing infrastructure (primarily in AWS), using infrastructure as code (mainly CDK), automation and collaborating with other product teams in cloud-native development. You have experience building, maintaining, and enhancing DevOps environments including source code version control, the CI/CD build pipeline, custom application deployments and resource monitoring. Familiar with iterative approaches, youâ€™ll recommend small and large improvements for our environment. What youâ€™ll do:

- Analyze and develop new code including automation, integration and unit tests
- Implement code fixes and support user testing
- Participate in and/or lead design sessions
- Actively contribute to code reviews providing constructive feedback to team members
- Ensure technical solutions and system integrations are developed and maintained in the most efficient and effective manner

What weâ€™re looking for:

- Proficient in a chosen technology stack
- Communicates moderate to complex technical concepts to technical and non-technical personnel
- Ability to conceptualize and articulate ideas clearly and concisely
- Ability to design and implement functional, easy to use frameworks
- Innovative problem-solver and critical thinker with a customer focus
- Advocate of smart, clean and maintainable code
- Passion for technology and software development

What youâ€™ll need:

- Bachelorâ€™s degree in computer science or engineering and at least six years of related experience (or an equivalent combination of education and experience)
