

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Collaborate with various business partners to enhance the understanding of data management policies and processes to ensure the confidentiality, integrity and availability of information. You will design and develop our policy framework, and research and apply related best practices. What you do:

- Develop and interpret information and data management policies and standards for value streams, product teams and process owners
- Implement governance and operating models
- Prioritize and assign incoming work requests
- Coach and mentor team members and data stewards, and manage staff change processes
- Partner with information stewards to aggregate insights and prepare recommendations
- Design, build and maintain information and data management repositories
- Develop and recommend key performance indicators related to information assets
- Provide change impact analysis for complex systems

What we are looking for:

- Confident verbal communicator with strong facilitation skills
- Relationship-builder with exceptional interpersonal skills
- Proven team leader passionate about helping others succeed
- Skilled negotiator with sound business judgment in all situations
- Analytical and conceptual thinker comfortable with multiple projects and priorities
- Strong attention to detail
- Team player who can lead in an agile, fast-changing environment

What we need:

- A bachelor's degree in information management, business administration or information technology and at least five years of experience (or equivalent combination of education and experience)
- Knowledge of methodologies, industry standards, trends and best practices
- Advanced understanding of related legal and regulatory requirements
- Proficiency with data management tools
