

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Highlights of the job

We are hiring up to one (1) permanent full-time System Analyst (OpenText Developer) position working out of Edmonton, AB. Do you have a natural ability to find solutions that tackle real business problems in a dynamic work environment Do you enjoy working in a team setting and interacting directly with clients, and providing user value If so, we're looking for a collaborative and knowledgeable Systems Analyst to support our billing applications area in our Applications Services department. As the System Analyst (OpenText Developer) in this area, you are focused on application maintenance and development of the OpenText as well as SAP ISU on HANA. This position may be eligible for EPCOR's hybrid work program. What you'd be responsible for

Ensuring the delivery of optimal results against appropriate performance metrics. Incident Delivery and Responsiveness Delivery on Change Request estimations Customer Satisfaction Surveys System Availability

Finalizing business requirements with stakeholders and conversion of business requirements to functional and non-functional requirements. Functional design, solution walkthrough, configuration and unit testing. Facilitating code changes, IST and UAT testing and process documentation. Assisting with the completion of Transition to Operations reviews and checklists. Evaluating and recommending the development and/or testing tools.

Coordinating testing and deployment of patches and hotfixes for development and testing tools. Monitoring application performance and tracking performance trends including hardware and OS resources. Providing expert advice on the OpenText and SAP Print Work Bench to Operational and Project teams as required. Working alongside customers and peers to gather requirements, provide feedback, and exchange ideas. Communicating and engaging with vendors and external support organizations for information gathering and issue resolution.

What's required to be successful

A post-secondary degree in Computer Science, Engineering, Computer Engineering, System Technology, and/or Management Information Systems diploma from a recognized post-secondary institution is required. 4+ years of experience working in OpenText modules is required. Experience in analyzing, designing, developing, testing, debugging, documenting and implementing customer requirements using OpenText Exstream. Understanding of different input, output file formats, and Print file formats (PDF, AFP etc.). Demonstrated capability to design, develop and unit test print forms and invoice and correspondence PDFs. Expertise in OpenText Communications server administration and Control Center in Linux environment. Proficient in Migration and implementation activities. Experience with SAP ISU and Print Workbench. Good understanding of SAP ISU application and S4/HANA systems. Exposure to ABAP coding and debugging.

As the successful Systems Analyst, you have the ability to react with urgency to troubleshoot critical issues when faced with application availability situations. You effectively communicate with others and demonstrate a collaborative approach in coordinating and working alongside others in a matrix organization. You comfortably translate technical concepts into information that is usable by your audiences. You are a problem solver. You take initiative and possess a calm and positive workstyle when completing your tasks. Other important facts about this job
