

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

<b>Job</b>	Type: Full-time	Category: Utilities	

### Description

#### Highlights of the job

We are hiring up to one (1) full-time permanent Power System Technician (Relay) in Edmonton, AB. This position works on the Transmission Operations Protection & SCADA team and directly reports to the Protection & SCADA Manager. A Power System Technician installs, maintains, calibrates, troubleshoots, repairs, modifies and commissions various types of protective relays, and substation protection and control circuits. This includes all protective relay systems within EPCOR's Distribution and Transmission network, substations, and various customer locations. What you'd be responsible for

Leading a team using strong interpersonal and communication skills to train, instruct, and assist in the technical orientation of other personnel. Planning and organizing maintenance and capital projects such as project schedules, safe work plans, materials, outage requirements, and isolation points. Exhibiting a safe, environmentally conscious, customer focused and professional work ethic at all times. Demonstrating knowledge of EPCOR's electrical system, protective relaying schemes, and communication protocols. Using a wide variety of test equipment to ensure proper operation of substation Protection, Control & SCADA devices. Interpreting drawing packages and analyze test reports to complete capital construction, maintenance, repairs and troubleshoot issues. Problem solving and analyzing to respond to emergency situations in a logical and reasoned manner even under strict deadlines. Conducting hazard assessments, and taking control over emergency situations to ensure work site safety. Adhering to proper safety regulations and safe work procedures. Prioritizing job, tasks, and allocating resources effectively. Ensuring the executing of job plans and accommodating unanticipated technical and resource challenges. Mentoring and coaching team members. Liaising with internal and external stakeholders and building and maintaining professional working relationships. Assisting with Protection and Control related duties. What's required to be successful

Successfully attained a high school diploma (GED, or equivalent level of secondary education) Journeyman Power Systems Electrician certificate 5+ years of recent Journeyman Power System Electrician experience in Transmission/Distribution Substations Valid Class 5 Alberta Motor Vehicle Operator's License, with 6 or fewer demerits, and ability to qualify for and maintain a valid EPCOR driver's permit Demonstrated knowledge and advanced ability in relay testing using Omicron Test Universe software interface; and IEC61850 protocol Demonstrated understanding of EPCOR's electrical system, Protective Relaying Schemes, Communication Protocols, and Relay setting interpretation/programming Ability to use a wide variety of test equipment, and interpret drawing packages and analyze test reports Proven proficiency in computer programs (i.e. Teams, Work, Excel and Outlook) Demonstrated problem solving and analytical skills with the ability to respond to emergency situations in a logical and reasoned manner even under strict deadlines Strong analytical and problem solving skills Exhibits supervisory and leadership ability Good physical condition to meet the physical demands of the position Clearance on pre-placement medical and drug/alcohol testing may be required Clearance on background check requirements related to ARS CIP

The qualifications (skills and behaviors) listed above are supplemented with your demonstrated excellent planning, organizational, and decision-making skills and sound judgement. You have open communication and leadership skills combined with the ability to handle new and/or emergency situations in a logical and reasoned manner. You maintain a strong team focus, show a sense of ownership, and demonstrate your interest in coaching, leading and empowering others. Additionally, you are a person that will seek out personal development opportunities to increase your technical and interpersonal skills as well as your knowledge and understanding of the work area. Other important facts about this job

Jurisdiction: IBEW1007 Class: PS4.8130A Wage: \$62.30 per hour Hours of work: 80 hours biweekly Application deadline: July 8, 2022 EPCOR employees: please ensure that you are using your "@epcor.com" email address. Learn more about Working at EPCOR! Follow us on LinkedIn, Twitter, Glassdoor, or Facebook! #LI-TA2 Please note the following information: A requirement of working for EPCOR is that you are at least 18 years of age, successfully attained a high school diploma (GED, or equivalent level of secondary education) and legally entitled to work in Canada. (A copy of a valid work permit may be required.) If you are considered for the position, clearance on all applicable background checks (which may include criminal, identity, educational, and/or credit) and professional reference checks is required. Some EPCOR positions require an enhanced level of background assessment, which is dictated by law. These positions require advanced criminal record checks that must also be conducted from time to time after commencement of employment. A technical/practical assessment may be administered during the selection process and this exercise will be used as a part of the selection criterion. To meet the physical demands required of some positions, candidates must be in good physical condition and willing to work in all weather conditions. Clearance on pre-placement medical and drug and alcohol testing may be required.
